

Requirement ID	Name	Description	1 (highest) - 3 (lowest)	Priority	Rationale	Author
1. Help Requests						
HR01	Submit Personal Help Request	The user shall provide the following information when submitting a personal help request:	1	The system needs certain information in order to assess how to help the victim, as well as to match the victim to a volunteer.	Teagan Donnelly	
HR01.1		- Requester name (required)	1		Teagan Donnelly	
HR01.2		- Physical address (required)	1		Teagan Donnelly	
HR01.3		- Access instructions (optional)	2		Teagan Donnelly	
HR01.4		- Household size (required)	1		Teagan Donnelly	
HR01.5		- Photo of affected area (optional)	2		Teagan Donnelly	
HR01.7		- Assistance type (required)	1		Teagan Donnelly	
HR01.8		- Additional comments (optional)	2		Teagan Donnelly	
HR02	Assistance Type	The system shall provide the following assistance types:	1	This allows the user to specifically request a certain type of help, so that their needs are adequately met.	Teagan Donnelly	
HR02.1		- Medical Assistance	1		Teagan Donnelly	
HR02.2		- Rescue Assistance	1		Teagan Donnelly	
HR02.3		- Property Damage Assistance	1		Teagan Donnelly	
HR02.4		- Pet Injury Assistance	1		Teagan Donnelly	
HR02.5		- Child Injury Assistance	1		Teagan Donnelly	
HR02.6		- Flood Assistance	1		Teagan Donnelly	
HR02.7		- Food or Supply Assistance	1		Teagan Donnelly	
HR03	Submit Help Request on Behalf of Another Person	The user shall be able to submit a help request on behalf of another person.	1	This is a priority so that in the case that one person does not have the ability to sign on to the platform, someone can submit a request on their behalf.	Teagan Donnelly	
HR04	Quick Report	The user shall be able to submit a quick report.	1	A user should be able to submit a quick request to expedite assistance if they are not able to fill out the entire request form.	Teagan Donnelly	
HR05	Quick Report Location	The system shall associate the user's current geographic location with a quick report when location services are enabled.	1	To ensure quicker help of the victims.	Teagan Donnelly	
HR06	Quick Report Assistance Type	The system shall provide the following quick-report assistance types:	1	This is the mandatory information needed in order to help a user who needs quick help.	Teagan Donnelly	
HR06.1		- Medical Emergency	1		Teagan Donnelly	
HR06.2		- Severe Hazard	1		Teagan Donnelly	
HR07	Add Information to Quick Report	The user shall be able to add information to a previously submitted quick report.	2	Allows a user to provide more information about their situation after they have already submitted a quick report.	Teagan Donnelly	
HR08	Public Infrastructure Request	The user shall be able to submit a public infrastructure request.	2	Allows users to report damage that may be dangerous or prevent volunteers from reaching victims.	Teagan Donnelly	
HR09	Public Infrastructure Request Type	The system shall provide the following public infrastructure request types:	2	The system needs to know what type of infrastructure damage occurred so that the appropriate response can be made.	Teagan Donnelly	
HR09.1		- Downed Power Line	2		Teagan Donnelly	
HR09.2		- Fallen Tree	2		Teagan Donnelly	
HR09.3		- Road Damage	2		Teagan Donnelly	
HR10	Edit Active Help Request	The user shall be able to edit the details of an active help request.	2	Allows users to correct or add information if something about their situation changes.	Teagan Donnelly	
HR11	Cancel Active Help Request	The user shall be able to cancel an active help request.	1	If help is no longer needed, the request should be canceled so that volunteers and resources are not unnecessarily sent.	Teagan Donnelly	
HR12	View Previous Help Requests	The user shall be able to view previously submitted help requests.	2	Allows users to keep track of the requests they have previously made.	Teagan Donnelly	
HR13	View Help Request Status	The user shall be able to view the current status of a submitted help request.	2	The user needs to know if their request has been received and whether help is on the way.	Teagan Donnelly	
HR14	Detect Duplicate Help Request	The system shall compare an incoming help request with existing active help requests to identify potential duplicates.	1	The system needs to identify possible duplicate requests so that the same situation does not receive resources twice.	Teagan Donnelly	
HR15	Duplicate Request Flag	The system shall flag an incoming help request when it is identified as a potential duplicate.	1	Allows a possible duplicate to be identified before volunteers or resources are assigned to it.	Teagan Donnelly	
HR16	Unique Request Handling	The system shall add an incoming help request to the active request list when it is not identified as a duplicate.	1	Requests that are not duplicates need to be added to the active request list so that they can receive help.	Teagan Donnelly	
HR17	Duplicate Request Information	The system shall associate new information from a confirmed duplicate request with the existing help request.	1	A duplicate request may contain new information that could help provide a better response to the original request.	Teagan Donnelly	
HR18	Request Urgency Flag	The system shall flag a help request as urgent when the requester identifies a medical emergency.	1	Medical emergencies need to be identified as urgent so that the most serious requests can receive help first.	Teagan Donnelly	
HR19	Emergency 911 Advisory	The system shall display a 911 emergency advisory when the user identifies a request as a life-threatening emergency.	1	This points the user to the right resources if their situation is beyond our scope to help.	Teagan Donnelly	
HR20	Emergency 911 Call	The system shall provide a control that initiates a telephone call to 911.	3	To assist the user to call 911 faster if they are in an emergency.	Teagan Donnelly	
2. Volunteer Management						
VM01	Register New Volunteer Profile	The volunteer shall create an account within the app.	3	Allows the volunteer to be able to accept and keep up with requests.	Cameron Seymore	
VM02	Record Volunteer Skills and Specialties	The volunteer shall list the skills they have.	3	Shows what type of request they are able to help with.	Cameron Seymore	
VM03	Record Professional and Medical Credentials	The program shall request proof of medical credentials.	3	Ensures that the volunteer is a certified medic.	Cameron Seymore	
VM04	Register Available Volunteer Equipment (e.g., Chainsaw, Generator)	The volunteer shall list any equipment they have available.	2	Show if the volunteer has the resources needed for the request.	Cameron Seymore	
VM05	Register Available Volunteer Vehicles (e.g., Truck, Boat)	The volunteer shall list any vehicles they have available.	1	Shows if the volunteer is able bring heavier things or carry out people.	Cameron Seymore	
VM06	Record Volunteer Availability Dates and Time Windows	The volunteer shall list the dates and times that they are available.	1	Shows when the volunteer will be able to accept a request.	Cameron Seymore	
VM07	Set Volunteer Operational Radius and Proximity Limit	The program shall have a radius limit for what request will show up.	2	Prevents the volunteer from getting request they are unable to reach in a reasonable time.	Cameron Seymore	
VM08	Background Checks	The volunteer shall submit background check verification.	1	Ensures the safety and security of all recipients before deploying volunteers.	Nicolas Gauvin	
VM09	Background Check Approval Status	The system shall track and display the background check approval status for all volunteers.	1	Ensures volunteers are kept up to date about their approval status.	Nicolas Gauvin	
VM10	Volunteer Notification System via Push Alerts	The system shall send push alerts to volunteers for notifications and urgent updates.	1	Provides real-time, high-priority communication directly to mobile devices for urgent updates.	Nicolas Gauvin	
VM11	Volunteer Notification System via Email Alerts	The system shall send email notifications to volunteers regarding assignments and updates.	1	Delivers detailed and reliable updates for routine assignments and schedules.	Nicolas Gauvin	
VM12	Volunteer Notification System via SMS Text Messages	The system shall send SMS text messages to volunteers for time-sensitive notifications.	1	Reaches volunteers quickly in time-sensitive situations.	Nicolas Gauvin	
VM13	Match Volunteers to Incidents via Skill-Based Prompting	The system shall match volunteers to incidents based on their recorded skills and capabilities.	1	Ensures specialized response tasks are assigned to qualified personnel.	Nicolas Gauvin	
VM14	Match Volunteers to Incidents via Geographical Proximity	The system shall match volunteers to incidents based on their geographical location and proximity.	1	Minimizes response times and travel costs by deploying volunteers nearest to the incident location.	Nicolas Gauvin	
VM15	Accept or Decline Assigned Relief Task	The system shall allow volunteers to accept or decline an assigned relief task.	1	Ensures accurate volunteer availability and enables timely re-allocation of declined tasks.	Nicolas Gauvin	
VM16	Track Volunteer Dispatch and Arrival Status	The system shall track volunteer dispatch and arrival status.	1	Provides operational visibility to confirm volunteer safety and monitor arrival times at relief sites.	Nicolas Gauvin	
3. Relief Coordination						
RC01	Prioritize Requests	The system shall sort requests based on urgency.	1	The system needs a way to prioritize allocation of scarce volunteer time.	Nicolas Gauvin	
RC02	Filter High-Severity Requests	The system shall route high severity requests to certified responders.	1	Only volunteers verified to have the necessary skills should be able to respond to high severity requests.	Nicolas Gauvin	
RC03	Flag Suspected Fraudulent Reports	The system shall flag suspected false or fraudulent reports.	2	Flagging false or fraudulent reports prevents wasting resources and ensures aid is directed to genuine emergencies.	Nicolas Gauvin	
RC04	Assign Verification Tasks to Call Reviewers	The system shall assign verification tasks to dedicated call reviewers.	2	Call reviewers are needed to verify report authenticity and prevent dispatching resources to false requests.	Nicolas Gauvin	
RC05	Record Verification Phone Call Outcome	The system shall allow call reviewers to record the outcome of a verification phone call.	2	Call reviewers need to log phone call outcomes to track request verification status and prevent unverified actions.	Nicolas Gauvin	
RC06	Detect Duplicate Incident Submissions from Same User	The system shall detect duplicate incident submissions originating from the same user or phone number.	2	Detects potential duplicate submissions.	Nicolas Gauvin	
		- The system shall check if duplicate submissions contain identical incident details.	2	Prevents system from flagging genuine requests originating from same user.	Nicolas Gauvin	
RC07	Detect Duplicate Incident Submissions from Same Address	The system shall detect duplicate incident submissions originating from the same physical address.	2	Detects potential duplicate submissions.	Nicolas Gauvin	
		- The system shall check if duplicate submissions contain identical incident details.	2	Prevents system from flagging genuine requests originating from same location.	Nicolas Gauvin	
RC08	Merge Duplicate Reports into Single Master Incident Record	The system shall merge duplicate reports into a single master incident record.	2	Consolidates duplicate incident information into a single record to prevent redundant resource allocation.	Nicolas Gauvin	

Requirement ID	Name	Description	1 (highest) - 3 (lowest)	Priority	Rationale	Author
HHR1.2.2		- gate codes	2			Aden Roof
HHR1.2.3		- landmarks	2			Aden Roof
HHR1.2.4		- building details	2			Aden Roof
14. Infrastructure / hazard report						
IHR1	hazard type	the user shall choose hazard types from a list:	1	damage to surroundings is common during hurricanes and such information should be reported so that it will minimally interfere with relief efforts		Aden Roof
IHR1.1		- downed power lines	1			Aden Roof
IHR1.2		- fallen trees	2			Aden Roof
IHR1.3		- road damage	2			Aden Roof
IHR1.4		- other	3			Aden Roof
IHR2	location	the user shall provide the location of the hazard	1	so the area of the hazard may be known		Aden Roof
IHR3	severity	the user shall report the severity of the hazard	1	the extent of the hazard		Aden Roof
IHR4	description	the user shall provide a description of the hazard "optional"	2	what exactly the hazard entails		Aden Roof
IHR5	photo	the user shall provide a photo of the hazard "optional"	2	what the hazard looks like and its surrounding area		Aden Roof
IHR6	time observed	the system shall include a time stamp with the report	2	when the hazard was discovered		Aden Roof
IHR7	hazard update	the system shall request confirmation of hazard from users nearby	2	to ensure the hazard warning is accurate users will be requested to verify its continued existence when near		Aden Roof
IHR7.1		an notification shall be sent to near by users asking if hazard still exists	2			Aden Roof
15. Request Management						
RM1	view request	coordinators shall view all requests groups by a list of categories:	1	to aid in request management coordinators will have a view window where they can separate the requests by their status type		Aden Roof
RM1.1		- pending	1			Aden Roof
RM1.2		- accepted	1			Aden Roof
RM1.3		- rejected	1			Aden Roof
RM1.4		- canceled	1			Aden Roof
RM1.5		- escalated	1			Aden Roof
RM2	duplicate detection	the system shall flag request sharing significant information with an existing request	1	to prevent waste of resources to the same request the system will compare request entries against each other looking for similarities that may indicate the request to be a duplicate and then flag it for confirmation by a coordinator		Aden Roof
RM2.1		- similar address	2			Aden Roof
RM2.2		- close geo proximity	2			Aden Roof
RM2.3		- similar request category	2			Aden Roof
RM2.4		- similar requester name	2			Aden Roof
RM2.5		- similar contact information	2			Aden Roof
RM2.6		- similar images	3			Aden Roof
RM3	request review	coordinators shall review aid requests performing the following:	1	to ensure proper use of material all requests will be reviewed and verified by coordinators and coordinators will be allowed a mix of options to ensure proper response to the request		Aden Roof
RM3.1		- confirm request	1			Aden Roof
RM3.1.1		- is confirmed: true, volunteers shall respond	1			Aden Roof
RM3.1.2		- is confirmed: false, volunteers shall not respond	1			Aden Roof
RM3.2		- deny request	1			Aden Roof
RM3.3		- mark duplicate	1			Aden Roof
RM3.4		- merge duplicates	1			Aden Roof
RM3.5		- edit type	2			Aden Roof
RM3.6		- edit urgency level	1			Aden Roof
RM3.7		- send information request to original requester	2			Aden Roof
RM3.8		- add internal notes	2			Aden Roof
RM3.9		- assign priority score (RM4)	1			Aden Roof
RM4	request priority	the system shall prioritize response to certain request using the following fields:	1	to ensure that proper care is given to requests they will be given a priority level by a coordinator based on a multitude of factors		Aden Roof
RM4.1		- coordinator priority level	1			Aden Roof
RM4.2		- is medical emergency	1			Aden Roof
RM4.3		- vulnerable personnel present	1			Aden Roof
RM4.3.1		- elderly	1			Aden Roof
RM4.3.2		- children	1			Aden Roof
RM4.4		- dire situation	1			Aden Roof
RM4.5		- number of affected people	1			Aden Roof
RM4.6		- length of time since request was made	2			Aden Roof
RM5	Request abandonment	volunteer shall abandon requests they are unable to fulfil	1	if a volunteer can not adequately respond to a request they accept it they may abandon it so that a more qualified volunteer may pick it up		Aden Roof
RM5.1		- volunteers shall provide explanation for abandonment	1			Aden Roof
RM5.2		- system shall notify requester of abandonment	1			Aden Roof
RM5.3		- system shall repopulate request to volunteer dashboard	1			Aden Roof
16. Volunteer management						
VM1	Volunteer dashboard	the system shall provide volunteers with a dashboard displaying the following information:	2	to provide clear means of response volunteers will be given a dashboard where they will find aid request, the request they are responding to and any warning for the area they are operating in		Aden Roof
VM1.1		- nearby available requests	2			Aden Roof
VM1.2		- suggested request to respond to based on volunteer skills	2			Aden Roof
VM1.3		- the currently accepted request	1			Aden Roof
VM1.4		- completed requests	2			Aden Roof
VM1.5		- area safety warnings	1			Aden Roof
VM1.6		- communication tools to reach coordinators	2			Aden Roof
VM2	volunteer availability	the system shall mark a responding volunteer as "unavailable to respond" to coordinators	1	for proper utilization of resources when a volunteer accepts a request they will be made unavailable for assignment by a coordinator so that one volunteer is not split between requests		Aden Roof
VM3	request acceptance	the system shall permit volunteers to respond to only one request at a time	1	to ensure adequate timing of responses volunteers will only be allowed to assist with one request at a time		Aden Roof
VM4	aid request	volunteers shall be able to request additional assistance to a request they are responding to	1	if a request is too much for one volunteer to handle they may request aid from another volunteer so that the request may be safely resolved		Aden Roof
VM5	request completion	volunteers shall mark requests completed providing the following information:	1	to ensure requests have been handled volunteers must provide information proving that the request has been resolved		Aden Roof
VM5.1		- completion notes	1			Aden Roof
VM5.2		- updated photos	2			Aden Roof
VM5.3		- supplies used	2			Aden Roof
VM5.4		- remaining needs	1			Aden Roof
VM5.5		- whether follow up is needed	2			Aden Roof
VM6	coordinator assignment	coordinators shall be able to assign available volunteers to requests	1	if requests are going unanswered coordinators can assign available volunteers to the request		Aden Roof
VM6.1		- the system shall notify assigned volunteers of their assignment	1			Aden Roof
17. Communication / notifications						
CN1	notify requesters	the system shall notify requesters of the status of their request (RM1)	1	for transparency of response requesters will be sent notifications about the status of their request		Aden Roof
CN2	display responding volunteer	the system shall inform requester who is responding to their request with the following information:	2	to let the requester know who is on the way they will be provided the name and contact information of the volunteer responding to them along with their estimated time of arrival		Aden Roof
CN2.1		- responder name	2			Aden Roof
CN2.2		- responder ETA	2			Aden Roof
CN2.3		- responder contact information	2			Aden Roof

Requirement ID	Name	Description	Priority	Rationale	Author
CN3	volunteer notifications	volunteers shall receive notification for the following events	1	to keep aid moving volunteers will receive notifications about request need by when they are not around enroute, now assignments from a coordinator.	Aden Roof
CN3.1		- nearby requests	2		Aden Roof
CN3.2		- new assignments from coordinator	1		Aden Roof
CN3.3		- area safety warnings	1	to ensure safety of volunteers area safety alerts will be issued	Aden Roof
CN3.4		- requests for additional responders to a request	1		Aden Roof
CN3.5		- check-in reminders	2	to ensure volunteer safety and well being they will be encouraged to check into a coordinator	Aden Roof
CN4	coordinator communication	the system shall allow for communication between volunteers and coordinators	1	for proper information flow and event understanding volunteers and coordinators will be able to contact and communicate to each other	Aden Roof
CN5	messaging on requests	the system shall allow for threaded comments on requests	2	to allow for further information gathering volunteers can leave messages on requests that the equesator may respond to	Aden Roof
CN6	delivery methods	The system shall allow for communication via the following methods:	2	to facilitate communication the program will allow it through a multitude of means	Aden Roof
CN6.1		- in-program notifications	1		Aden Roof
CN6.2		- text message	2		Aden Roof
CN6.3		- email	2		Aden Roof
CN6.4		- phone calls	2		Aden Roof
CN6.5		- program text channels	2		Aden Roof
